Interstate ITS & DMS Implementation Project, Phase 3 (P.I. No. 0017411)

Project Overview

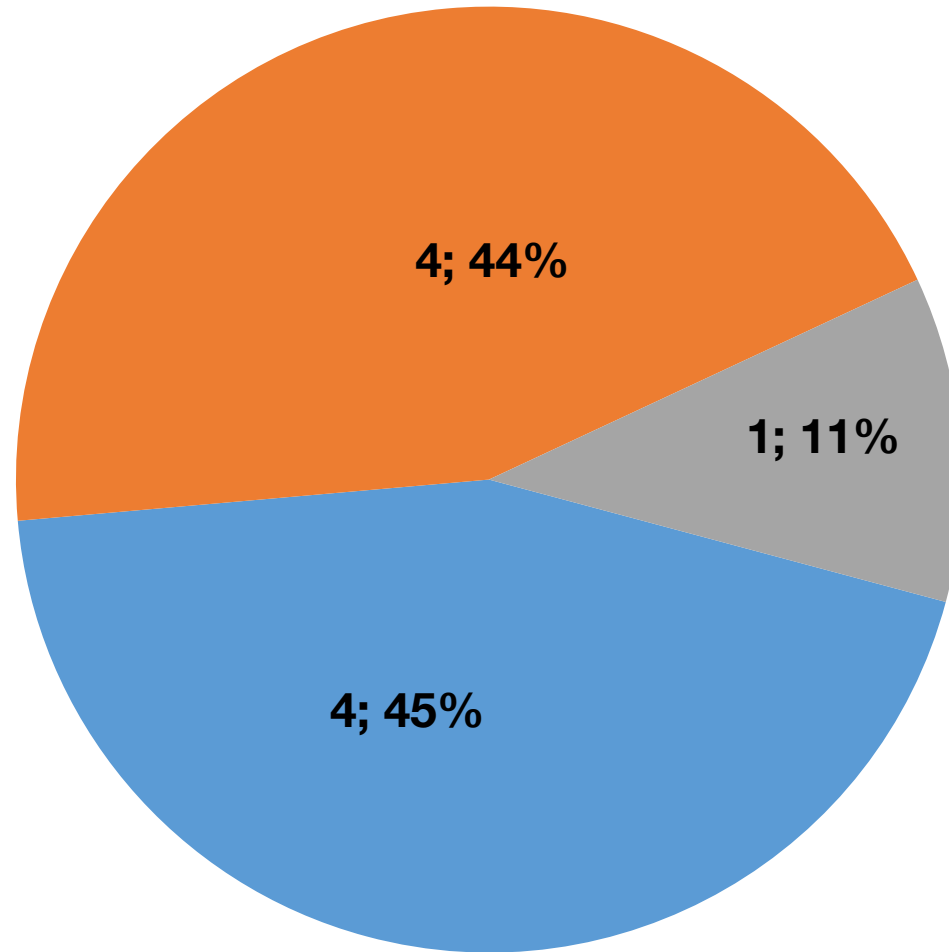

The Phase 3 project is programmed to install new fiber optic cable along I-95 and new closed-circuit television (CCTV) cameras at various locations, improving connectivity, operations, and safety along the entire I-95 corridor and surrounding areas. ITS infrastructure needs to be installed to provide coverage for high crash areas, to provide guidance during hurricane evacuations, and to provide traveler information messages to all motorists who use this route, optimizing operations and safety.

GHRAC 2024 Award for Excellence

HOW TO USE THIS HANDBOOK

This handbook provides tools for assessing the historical significance of Georgia's burial grounds within a three-part structure. It starts with Section One, the narrative, which is presented both chronologically and topically and was authored by a number of individuals to widen its perspective. The goal of this narrative is to provide historic context to burials in Georgia. Next, Section Two provides a literal toolkit that furnishes: a common vocabulary for describing cemetery features; defines specific types and styles of cemeteries in Georgia; and discusses cemetery survey methods. Finally, Section Three offers a process for evaluating historical significance and determining eligibility for the NRHP. It is important to note that there are no shortcuts, it is vital to use all three sections of the handbook to reach a detailed evaluation of a cemetery for the purpose of Section 106 compliance.
