

GEORGIA AIRPORTS MEAN BUSINESS

GEORGIA

STATEWIDE AVIATION SYSTEM PLAN

SUMMARY REPORT FOR
**JESUP-WAYNE
COUNTY AIRPORT**

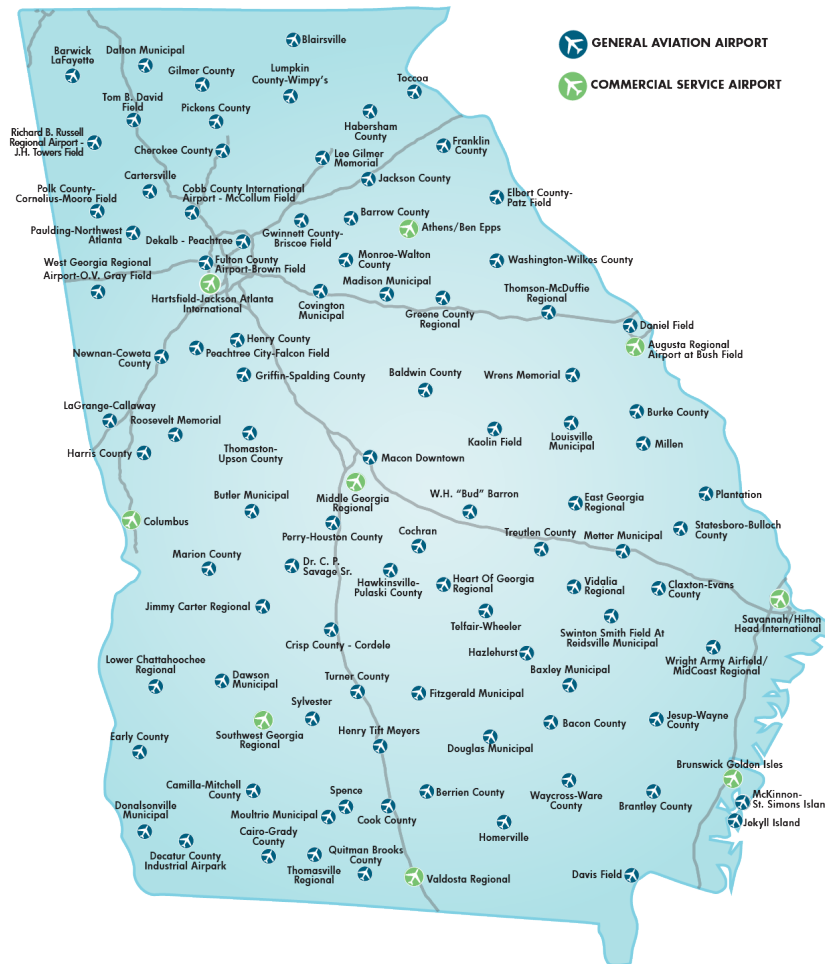

GEORGIA AIRPORTS MEAN BUSINESS

OVERVIEW

The Georgia Department of Transportation, Aviation Programs Office, has recently completed an update to the Georgia Statewide Aviation System Plan (GSASP). This report provides a summary of information from the GSASP and highlights important information from the study as it pertains specifically to Jesup-Wayne County Airport (JES). This report provides the following:

- » System Planning Process and Uses for the Plan
- » Georgia Airport Levels
- » Background Information for the Airport
- » Recommended Level for the Airport
- » Comparative Performance for the Airport
- » Outlook for Aviation Demand
- » Other GSASP Efforts
- » Local Governments Adjacent to the Airport with Land Use Controls
- » Airport Control of Runway Protection Zones
- » Airport Report Card and Recommendations

EXISTING GEORGIA AIRPORT SYSTEM 2017

More information on the Georgia Statewide Aviation System Plan can be obtained from the GDOT Aviation website at www.dot.ga.gov/IS/AirportAid/AviationSystemPlan. In addition to the complete Technical Report, a statewide Executive Summary and Summary Video were also produced to support the GSASP. More information on all GSASP-related products can be obtained from GDOT Aviation by emailing aviationprograms@dot.ga.gov.

THE SYSTEM PLANNING PROCESS AND USES FOR THE PLAN

The process used to update the GSASP was consistent with FAA’s Advisory Circular 150/5070-7 - *The Airport System Planning Process*. Ultimately, the GSASP recommendations for Jesup-Wayne County Airport are a blend of projects/actions identified by the system plan and projects related to pavement maintenance and rehabilitation from Georgia’s 2012 Statewide Airfield Pavement Management Study. An update to the Statewide Airfield Pavement Management Study began in 2018; when that analysis is completed, additional projects in the pavement management and maintenance categories will likely be identified for the Airport.

The GSASP is important because it gathers information on current activity, facilities, and services at the 103 study airports. One objective for this update was to provide information showing how the system has changed since the 2002 GSASP was published. As shown in the graphics below, GDOT, FAA, and local investments at system airports have significantly elevated statewide system performance for the measures shown here.

CHANGES IN GEORGIA AIRPORT SYSTEM PERFORMANCE

PERCENTAGE OF AIRPORTS WITH A RUNWAY LENGTH OF 4,000 FEET OR GREATER

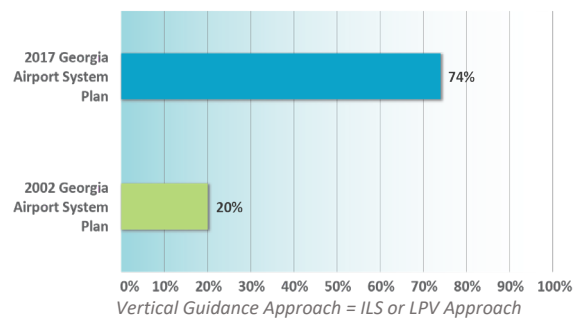

PERCENTAGE OF AIRPORTS WITH WEATHER REPORTING EQUIPMENT

PERCENTAGE OF AIRPORTS WITH A RUNWAY LENGTH OF 5,000 FEET OR GREATER

PERCENTAGE OF AIRPORTS WITH A VERTICAL GUIDANCE APPROACH

PERCENTAGE OF AIRPORTS WITH A RUNWAY LENGTH OF 5,500 FEET OR GREATER

PERCENTAGE OF AIRPORTS WITH A PUBLISHED APPROACH

GEORGIA AIRPORT LEVELS

The Statewide Aviation System Plan was last published in 2002. Since that time, Georgia airports have made significant progress toward meeting the GSASP performance measures. This update to the GSASP reset the bar for future system performance. This included identifying projects for individual airports that are needed to improve system performance in the coming years. It also included evaluating current state system planning levels for all system airports and determining if airport assigned levels should change to improve overall system accessibility and performance. The GSASP update also addressed the need for additional or replacement system airports. Each of the 103 airports was assigned to one of the following levels:

AIRPORT LEVELS

LEVEL I	Minimum Standard General Aviation Airport: Level I facilities support a reasonable percentage of the general aviation fleet, including small business aircraft. Level I is recognized as the minimum to which airports in the system are recommended to develop. Objectives recommend a minimum runway length of 4,000 feet.
LEVEL II	Business Airport of Local Impact: Level II airports should be capable of accommodating all business and personnel use single- and twin-engine general aviation aircraft and 85% of business jet aircraft. The minimum runway length objective for Level II airports is 5,000 feet.
LEVEL III	Business Airports of Regional Impact: Level III airports are defined as the existing air carrier airports and general aviation airports that have a regional business impact. These airports are recommended to have at least 5,500 feet of runway and precision-like approaches to accommodate 95% of business jet aircraft.

A map of the recommended levels for airports in the Georgia system is shown on the next page. For the most part, after a thorough review of the existing system, current roles are unchanged. System plan recommendations include one new Level III airport, one airport upgraded from Level II to Level III, and two new Level II replacement airports. It is important to note that the identified level for each airport is the airport’s minimum recommendation; an airport’s actual facilities are determined by the airport owner or owners.

RECOMMENDED LEVELS FOR GEORGIA AIRPORTS

BACKGROUND INFORMATION FOR JESUP-WAYNE COUNTY AIRPORT

The Jesup-Wayne County Airport is located in Wayne County in southeastern Georgia approximately 40 miles northwest of Brunswick and 70 miles southwest of Savannah. Primary access to the Airport is gained from the north and south via U.S. Highways 25, 301, and 341, and from the east and west via U.S. Highway 84 and Interstate 95.

The Airport, situated on 139 acres, is owned and operated by Wayne County. The Airport accommodates a variety of aviation-related activities that include corporate/business jets, recreational flying, police/law enforcement, prisoner transport, and agricultural spraying.

AIRPORT DIAGRAM

30-MINUTE DRIVE TIME SERVICE AREA AND POPULATION

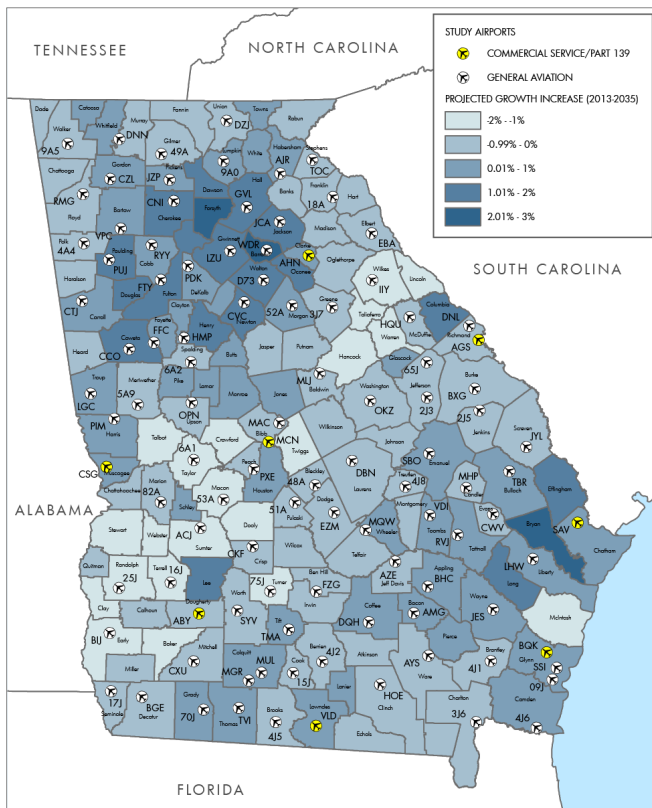

Source: Moffatt & Nichol

Assigned levels for Georgia airports consider the characteristics of the area the airport serves. Analysis for the GSASP was conducted using a geographic information system (GIS) and a 30-minute drive time for each airport. The county's population growth rate as well as the employment growth rate are expected to be within the state average. Georgia's projected average annual rate of growth for population is between 0.5% and 1.49%; for employment, the average is between 0.998% and 1.39%.

Wayne County	
Projected Population Growth	
2013*	30,077
2035	34,188
2013-2035	0.58%
Projected Employment Growth	
2015*	11,640
2035	14,620
2015-2035	1.15%

*Reported as current

RECOMMENDED LEVEL FOR JESUP-WAYNE COUNTY AIRPORT

Jesup-Wayne County Airport has been assigned to Level III within the Georgia airport system. As a Level III airport, the GSASP has identified certain facilities and services that should ideally be in place at the Airport. These objectives are considered the “minimums” to which the Airport should be developed. Based on local needs/justification, it is quite possible that the Airport could exceed its minimum development objectives established in the GSASP. Jesup-Wayne County Airport’s specific objectives, as they pertain to the Airport’s Level III role in the state airport system, are listed below.

OBJECTIVES FOR LEVEL III – BUSINESS AIRPORTS OF REGIONAL IMPACT

Airside Facilities

- » **Runway Length:** Minimum 5,500 feet
- » **Runway Width:** 100 feet
- » **Taxiway:** Full parallel
- » **Lighting Systems:** HIRL for precision approaches and commercial service airports; MITL and approach lights
- » **Approach:** Precision
- » **NAVAIDS/Visual aids:** Rotating beacon, segmented circle and wind cone, PAPIs, others as required for non-precision/precision approach
- » **Weather Reporting:** AWOS or ASOS
- » **Runway Pavement Strength:** 30,000 pounds single-wheel/120,000 pounds dual-wheel
- » **Airfield Signage:** Runway hold position, location, and guidance signs
- » **Fencing:** Entire airport

General Aviation Facilities

- » **Hangared Aircraft Storage:** 70% of based aircraft fleet
- » **Apron Parking/Storage:** 30% of based aircraft fleet plus an additional 75% for transient aircraft
- » **Terminal/Administration:** 2,500 square feet minimum of public use space including restrooms, conference area, and pilots’ lounge
- » **Auto Parking:** One space for each based aircraft plus an additional 50% for visitors/employees

Services

- » **Fuel:** AvGas and/or Jet fuel
- » **FBO:** Full service
- » **Maintenance:** Full service
- » **Rental Cars:** Available

COMPARATIVE PERFORMANCE JESUP-WAYNE COUNTY AIRPORT

One objective for the system plan update was to show how airports in the state have changed since the plan was last prepared in 2002. The following chart shows how facilities and services at Jesup-Wayne County Airport performed against system plan objectives between 2002 and 2017. Objectives are listed on the previous page and in the Report Card. It is worth noting that in some instances data collection efforts in 2002 versus 2017 were not identical, making it difficult to compare changes.

FACILITY/SERVICE COMPARISON - 2002 VS 2017

Facility or Service	2002 Actual	2017 Actual
Runway Length	5,500 feet	5,500 Feet
Runway Width	75 feet	100 Feet
Taxiway	No	Turnarounds on Both Runway Ends
Primary Runway PCI	70	91
Primary Runway Safety Area	300 Feet x 150 Feet	300 Feet x 150 Feet
Runway to Taxiway Separation	Not Applicable	200 Feet
Lighting System		
– Runway	MIRL	MIRL
– Taxiway	Not Applicable	HITL
Approach Lighting System	None	None
Approach Type	Non-Precision	LPV
Weather Reporting	Yes	AWOS
Navigational Aids		
– Rotating Beacon	Rotating Beacon	Rotating Beacon
– VGSIs	PAPI and VASI	PAPIs/PAPIs
– Segmented Circle	Segmented Circle	Segmented Circle
– Wind Cone	Not Collected in 2002	Wind Cone
Airfield Signage	Not Collected in 2002	None
Fencing	Not Collected in 2002	Partial
Hangared Aircraft Storage	9	15
Apron Parking/Storage	6	10
General Aviation Terminal/Administration	2,000 Sq Ft	5,200 Sq Ft w/Restrooms, Conference Area, Pilots' Lounge
General Aviation Auto Parking	0	24
Fuel	AvGas and JetA	AvGas and JetA
FBO	No	Full Service
Maintenance	Not Collected in 2002	Full Service
Rental Cars	Not Collected in 2002	Available

OUTLOOK FOR AVIATION DEMAND

While most development objectives for Jesup-Wayne County Airport are driven by role rather than demand, it is still important to have a general sense of how activity (based aircraft and annual operations) at the Airport could change in the coming years. The following table shows projections for the Airport developed as part of the GSASP. Forecast methodologies used in the GSASP included analysis of historic growth, FAA trends, and county-specific projections of population and employment. It is worth noting that demand projections developed as part of a state aviation system plan tend to be far more conservative than demand projections developed as part of an individual airport master plan or Airport Layout Plan (ALP) report. Statewide, the average annual compound rate of growth for both based aircraft and annual general aviation operations is expected to be 0.54%.

JESUP-WAYNE COUNTY AIRPORT PROJECTIONS OF AVIATION DEMAND

	Based Aircraft	Annual General Aviation Operations
2016 Actual	15	6,000
2020	15	6,100
2025	16	6,300
2035	17	6,600

Following the completion of Georgia’s last statewide aviation system plan, the cost of acquiring and maintaining a general aviation plane, the cost to secure a private pilot’s license, competing opportunities for allocation of disposable income, along with increases in the cost of aviation fuel, have all contributed to a contraction in general aviation demand.

Recent economic recovery and increased use of general aviation as a tool to improve business efficiency have helped to stabilize the general aviation industry. For most airports in Georgia, however, anticipated growth in general aviation demand will be modest at best. The graph below shows statewide projections of based aircraft and annual general aviation operations for the 103 study airports as they were developed in the GSASP update.

STATEWIDE PROJECTIONS OF BASED AIRCRAFT AND ANNUAL GENERAL AVIATION OPERATIONS

OTHER GSASP EFFORTS

As part of the GSASP, additional efforts were included to determine how well the existing system is currently performing. This additional research included the following:

- » **A land use and zoning inventory**
- » **Investigation to determine airport control of runway protection zones (RPZs)**
- » **An inventory of through-the-fence operators**

A summary of statewide findings for each of these studies is below, followed by airport-specific results for each of these three areas of analysis.

- » **Land Use and Zoning:** According to FAA grant assurance #21, airports in the federal system should take appropriate steps to promote compatible land use in the airport environs. Study research indicates that there are at least 196 local governments in Georgia that border one of the system airports. According to study findings, only 40 of these municipalities currently have airport-specific land use zoning in place.
- » **RPZ Control:** The FAA encourages all airports in the federal airport system to have control through acquisition or land use planning/zoning over their RPZs; the RPZ is the area designated off each airport runway end to help promote safety. There are 280 RPZs for all study runways. While most of these RPZs are under partial airport control, study research determined that only 84 out of the 280 RPZs are under control. An estimated \$332 million is needed to bring all RPZs at system airports under control.
- » **Through-the-Fence Operations:** The FAA discourages airports in the federal system from allowing off-airport businesses to have access to an airport's runway facilities. When an off-airport business does have access to an airport's airfield facilities, these businesses are typically referred to as through-the-fence operators. Only 17 of 103 airports in the Georgia system have any type of through-the-fence operator.

Airport-specific findings for these tasks, as applicable, follow.

LOCAL GOVERNMENTS ADJACENT TO JESUP-WAYNE COUNTY AIRPORT WITH LAND USE CONTROLS

Having land use and activities around airports that are compatible with aircraft operations is imperative from a safety standpoint. Airports that accept state and/or federal grants are obligated to take steps to promote compatible land use and activities in the environs of their airport. For the GSASP analysis, airports identified local governments in the environs of their airport. It is likely that the local governments identified by the Airport are the primary local governments adjacent to the Airport, but it is possible that if the Airport’s extended safety and control surfaces designated by the FAA were considered, there could be additional local governments (beyond those reported here) that are in the airport environs.

Research was undertaken for local governments identified during the GSASP to determine if the local governments are taking steps to establish compatible land use and protect the operating environments for airports throughout the state. Local governments adjacent to Georgia airports were investigated to determine the following:

- » **Has the local government adopted land use zoning controls?**
- » **Does the local government have an airport specific overlay zone or district?**
- » **Does the local government have a land use map that shows the location of the airport?**
- » **Has the local government adopted height restriction zoning around the airport?**

The following table shows local governments adjacent to Jesup-Wayne County Airport and summarizes the status of land use controls for each. Local governments and airports throughout Georgia need to work together to help ensure airports are protected from incompatible land uses and from the encroachment of obstacles that pose a height hazard to safe airport operations.

LAND USE CONTROL SUMMARY FOR JESUP-WAYNE COUNTY AIRPORT

Type of Control	Local Governments Adjacent to the Airport	
	City of Jesup	Wayne County
Adopted Land Use Ordinance	Yes	No
Adopted Height Zoning Ordinance	Yes	No
Land Use Map	Yes	Yes
Airport Overlay Zone/District	No	No

Model ordinances to control land use and the height of objects in the airport environs are available on the GDOT website: www.dot.ga.gov/IS/AirportAid/AviationSystemPlan.

AIRPORT CONTROL OF RUNWAY PROTECTION ZONES

A review of all RPZs was undertaken as part of the GSASP update. The RPZ is an FAA-designated safety zone off the end of each active runway; the size of the RPZ for each runway end is established by FAA guidelines and varies by the type of approach (visual, non-precision, precision) to the runway end. FAA standards indicate that all airports should have control over each RPZ either through fee simple ownership of the land within the RPZ or through avigation easements. Statewide, 84 (30%) of the 280 RPZs at all study airports are reported as under airport control.

As part of the GSASP analysis, categories were established for types of use within the RPZs at Georgia airports. Once these categories were identified, additional analysis was undertaken to identify potential costs by category that could be incurred to bring all RPZs under airport control. The analysis included the following:

- » **Areas of the Airport’s RPZ that are not fully under Airport control.**
- » **Types of use(s) and/or development in the uncontrolled portions of the Airport’s RPZs.**
- » **Estimated cost to bring uncontrolled RPZ areas under Airport control.**

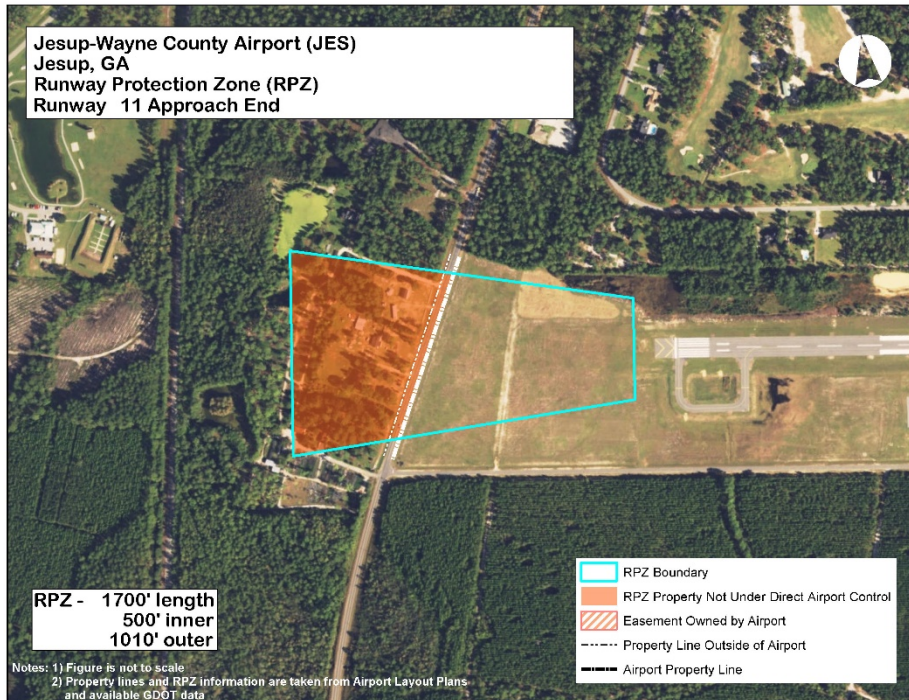

As indicated through the GSASP analysis, the cost to bring all portions of the Airport’s RPZs under Airport control is estimated to be **\$2,904,243**. Airports are highly encouraged to gain control over RPZs to prevent incompatible land uses.

JESUP-WAYNE COUNTY AIRPORT RPZ CONTROL

	Runway	
	11	29
<i>Identified Land/Property Acquisitions</i>		
Total Acres Outside Airport Control	15	0
– Urban Acres	0	0
– Rural Acres	15	0
<i>Associated Costs</i>		
Property Acquisition Costs		
– Urban Land Acquisition Costs*	-	-
– Rural Land Acquisition Costs*	\$75,000	-
– Residential Property Acquisition Costs	\$625,000	-
– Commercial Property Acquisition Costs	\$2,000,000	-
Relocation Costs		
– Paved Road Relocation Costs	\$204,243	-
– Unpaved Road Relocation Costs	-	-
– Railroad Relocation Costs	-	-
Subtotal	\$2,904,243	
Total	\$2,904,243	

Note: * The urban vs. rural classification for property acquisition costs generally followed the Georgia Urbanized Areas as presented in GDOT’s “Statewide Functional Classification and Urban Area Boundary Update” from February 2014. The land use definitions were further defined by observations of characteristics around each airport.

JESUP-WAYNE COUNTY AIRPORT RPZ – 11 APPROACH END

JESUP-WAYNE COUNTY AIRPORT RPZ – 29 APPROACH END

AIRPORT REPORT CARD AND RECOMMENDATIONS

This report provides information on GSASP facility/service objectives associated with a Level III airport in the state airport system. The Report Card on the following pages shows Jesup-Wayne County Airport's ability to meet its objectives. If the Airport does not meet an objective, an estimated cost to enable the Airport to meet the objective was developed. The GSASP also reviewed the Airport's current capital improvement plan (CIP), as submitted to GDOT; while the GSASP identified costs to meet system plan objectives, CIP costs to meet local airport development goals are also included in the Report Card.

Pavement projects identified for the Airport in the 2012 Statewide Airfield Pavement Management Study that have not yet been completed are also shown in the Airport's Report Card. The Airport's pavement projects were compared to the projects from the system plan and the Airport's CIP to avoid duplication. An update to GDOT's Statewide Airfield Pavement Management Study is underway and expected to be complete in early 2019.

The GSASP identified that over the next five years, an estimated \$1.34 billion will be needed to maintain and improve all commercial and general aviation airports in Georgia to their system plan recommendations; an additional \$710.6 million will be needed to meet the additional goals of local communities. Sources for the total financial need of \$2.05 billion are shown in the pie chart below.

AREAS OF FINANCIAL NEED TO MAINTAIN AND IMPROVE THE GEORGIA AIRPORT SYSTEM

The GSASP focuses on recommendations and costs to implement needs identified in the study. The Report Cards also include airport CIPs to enable airports to understand the potential costs to meet both GSASP and local development objectives. Of the \$2.05 billion financial need, 35% is related to locally developed CIPs.

When the Airport's system plan projects are considered, it is estimated that a total of **\$6,447,000** will be needed over the next five years. When the Airport's CIP is included, the total need is estimated at **\$10,843,373**. On average over the next five years, **\$2,168,675** will be needed on an annual basis to maintain and improve the Airport. GDOT's last statewide economic impact study, completed in 2012, shows that the Airport is responsible for an estimated **\$851,200** in annual economic impact. An airport's economic impact is only one measure of its value to the community: airports are important to attracting and retaining economic development. Investing in airport infrastructure can help with business attraction, making airports worth the investment.

The Report Card for Jesup-Wayne County Airport, developed as part of the system plan, is shown on the following pages.

Jesup-Wayne County Airport Report Card

AIRPORT NAME: Jesup-Wayne County Airport	CITY: Jesup, Georgia
COUNTY: Wayne County	AIRPORT CODE: JES

Jesup-Wayne County Airport Report Card

Actions Needed to Meet Facility and Service Objectives

	Actual	Minimum Objective	Objective Met	Improvement Needed	Estimated Cost
Runway Length	5,500 Feet	5,500 Feet	Yes	-	-
Runway Width	100 Feet	100 Feet	Yes	-	-
Taxiway	Turnarounds on Both Runway Ends	Full Parallel	No	Add Full Parallel Taxiway*	\$4,000,000
Primary Runway PCI	91	70 or Greater	Yes	-	-
Primary Runway Safety Area	300 Feet x 150 Feet	300 Feet x 150 Feet	Yes	-	-
Runway to Taxiway Separation	200 Feet	240 Feet	No	Construct Parallel Taxiway to Meet Standard**	-
Lighting System					
– Runway	MIRL	HIRL (for precision Approaches) or MIRL	Yes	-	-
– Taxiway	HITL	MITL	Yes	Add HIRL to Parallel Taxiway**	-
– Approach Lighting System	None	ALS	No	Install ALS	\$1,500,000
Approach Type	LPV	Near-Precision	Yes	-	-
Weather Reporting	AWOS	AWOS or ASOS	Yes	-	-
Navigational Aids					
– Rotating Beacon	Rotating Beacon	Rotating Beacon	Yes	-	-
– VGS	PAPIs/PAPIs	PAPIs	Yes	-	-
– Segmented Circle	Segmented Circle	Segmented Circle	Yes	-	-
– Wind Cone	Wind Cone	Wind Cone	Yes	-	-
Airfield Signage	None	Hold Position, Location, and Guidance	No	Add RW Hold Position, Location, and Guidance Signs	\$235,000
Fencing	Partial	Full Perimeter	No	Install 28,000 LF Fencing	\$700,000
Hangared Aircraft Storage	15	70% of Based Aircraft Fleet	Yes	-	-
Apron Parking/Storage	10	30% of Based Aircraft Fleet Plus an Add'l 75% for Transient Aircraft	Yes	-	-
General Aviation Terminal/Administration	5,200 Sq Ft w/Restrooms, Conference Area, Pilots' Lounge	2,500 Square Feet of Public Use Space Including Restrooms, Conference Area, and Pilots' Lounge	Yes	-	-
General Aviation Auto Parking	24	1 Space for Each Based Aircraft Plus an Add'l 50% for Visitors/Employees	No	Add 1 Auto Parking Space	\$12,000
Fuel	AvGas and Jet A	AvGas and/or Jet Fuel	Yes	-	-
FBO	Full Service	Full Service	Yes	-	-
Maintenance	Full Service	Full Service	Yes	-	-
Rental Cars	Available	Available	Yes	-	-
Estimated SASP Facility/Service Project Cost					\$6,447,000

* Estimated project cost is derived from Airport's recent 5-year CIP.

** Estimated project cost is included in a related project's estimated cost.

Jesup-Wayne County Airport Report Card

Runway Protection Zone Mitigation Projects

Runway End	Estimated Land Cost	Estimated Residential/Commercial Property Cost	Estimated Road Cost	Estimated Railroad Cost	Total Estimated Cost
– RW 11	\$75,000	\$2,625,000	\$204,243	No Action	\$2,904,243
– RW 29	No Action	No Action	No Action	No Action	\$0
				Estimated RPZ Mitigation Project Costs	\$2,904,243

Major Pavement Maintenance Projects Planned

	Project Description	Estimated Cost
Apron	Global Preventative (e.g. Surface Treatment to Entire Pavement)	\$20,666
	Estimated Major Pavement Project Costs	\$20,666

Capital Improvement Plan (CIP) Projects Planned 2018-2022

Program Year	Project Type	Project Description	Estimated Cost
2019	Hangars	Design T-Hangars	\$104,588
2021	Hangars	Construct T-Hangar (10-Unit)	\$683,438
2022	Hangars	Construct T-Hangar (10-Unit)	\$683,438
		Estimated CIP Project Costs	\$1,471,464
		Total Estimated Project Costs	\$10,843,373
