Approximately 13,500 linear feet of two-lane roads will be converted into a one-lane road, approximately 2,900 linear feet of new five-foot side walks will be added, along with the installation of approximately 234 new solar-powered lighting fixtures and the replacement of three failing culverts. Maple Street Neighborhood Connectivity Project - Phase 1	2024	Carroll	City of Carrollton	The City of Carrollton is awarded \$9.2 million in funding to implement a Complete Streets system on a busy section of Maple Street—the primary corridor between the University of West Georgia and the downtown square—to make it safer for people who are walking and biking. Safety concerns include an unsafe environment for people outside of a vehicle, poor access management, and frequent speeding. Although Maple Street was redesignated as a local roadway after serving as Georgia State Route 166, its highway-styled design remains. The downtown area has seen an influx of new businesses and homes, but neighborhood amenities are not easily accessible due to minimal pedestrian- and bicycle- infrastructure. This project will address these issues by installing a roundabout, dedicated bicycle lanes, signal equipment upgrades, crosswalk visibility enhancements, pedestrian mid-block crossings, ADA-compliant sidewalks, reduced lane width, enhanced corridor lighting, ingress and egress improvements, and signage improvements. These enhancements will help lower vehicle speeds throughout the corridor, reduce conflict points, and provide safer mobility for vulnerable road users.	Construction	SS4A	\$9,200,000	\$2,300,000	\$11,500,000	Title 23	Local	6	3
