**TO:** Divisions of Engineering, Permits/Operations, Field Services, Construction, P3, and Program Delivery, and Offices of Engineering Services, TIA, and Local Grants

**SUBJECT** 2025 Construction Standards and Details Book

The 2025 Construction Standards and Details Book (CS&D Book) has been published and is available for download from the ROADS Construction Standards & Details web page<sup>1</sup>. Nine construction standards (standards) and construction details (details) have been revised. Many of the revisions were made to match updated guidance with the recently published Manual on Uniform Traffic Control Devices, 11<sup>th</sup> Edition (MUTCD). This includes a revision of the minimum striping width to 6 in.

Twenty-three new details have been added for bike boxes (T-26A to T-26G), rectangular rapid flashing beacons (T-27A to T-27H), and rumble strips (T-30 to T-37). Ten details have been removed, including D-26, G-4, G-08, T-15A, T-15B, T-23A, T-23B, T-23C, T-24, and T-25. Several of these details were replaced by new rumble strip details.

The GDOT Design Policy Manual will be updated to provide guidance on the use of the new rumble strip details. The revised standards and details require changes to the calculation of some quantities and some new pay items. The new pay items and revised supplemental specifications will be available in the next few weeks.

**The 2025 CS&D Book will be effective for use on projects letting from January through December 2025.**
